Sustainability

Awareness and approach are central to Dutch Decor. We are aware of our ecological footprint and its impact on the world. Therefore we are continuously working on making our brand more sustainable. This includes the complete process from cotton to the final product. Dutch Decor strives and contributes to a sustainable society.

Global Recycled Standard

The quality team of Dutch Decor is continuously improving and innovating the production process and obtaining the necessary certifications for our products. We are proud of the fact that we have the first products fully recycled in our Eco Line collection with the Global Recycled Standard label.

We aim to have even more products certified in the future. One way we are doing this is by having our recycled materials comply with the Global Recycled Standard certification. They are intended to check the recycled material in products and to monitor the social, ecological and chemical impact of production. Global Recycled Standard aims to set requirements for the materials used and good working conditions, and to limit the environmental impact as much as possible.

OEKO-TEX STANDARD 100

Dutch Decor wants to be sure that we offer a good and safe product. Therefore, many products are OEKO-TEX STANDARD 100 certified. They are a global certification system for raw materials and textile products. It concerns our cushion cover, cushion filling and our plaids and poufs.

Our entire production process is tested to ensure that many of our products are harmless to humans. Our products are tested for compliance with the legal rules and regulations concerning environmentally harmful substances such as heavy metals, harmful colourings and plant protection products.

Better Cotton Initiative

Some of our cotton is produced according to the guidelines of the Better Cotton Initiative (BCI). BCI is a global non-profit organization and the largest cotton sustainability program in the world. BCI started over ten years ago with the aim of improving global cotton production for both cotton growers and the future of the environmental and cotton sector.

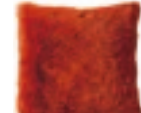

BCI truly supports cotton farmers. The focus is on providing training and learning opportunities for these farmers to adopt more environmentally, socially and economically sustainable production practices.
